## TECHNICAL SKILLS

### LANGUAGES & FRAMEWORKS:

- HTML, CSS, JavaScript, TypeScript, React.js, Redux, Next.js

### STYLING TOOLS:

- Bootstrap, Tailwind, Responsive Design

### TOOLS & WORKFLOW:

- Git, GitHub, VS Code, Chrome DevTools

## WORK EXPERIENCE

### FRONT-END DEVELOPER TRAINEE – ROUTE ACADEMY  Sep 2024 - Apr 2025

- Completed an intensive front-end development course focused on practical application. Built several responsive projects.
- Gained hands-on experience with React.js, Next.js, Redux, Bootstrap, and TypeScript.
- Collaborate with peers on code reviews.

### FRONT-END PROGRAM – ELMADRASAH PLATFORM  Apr 2025 - Present

- The program focuses on building a solid foundation in web development. It includes:
  - JavaScript fundamentals
  - React basics and deep-dive topics
  - Git & GitHub workflow
  - ChatGPT for developers
  - Real-world React projects

## EDUCATION

### CULTURE AND SCIENCE CITY

Oct 2018 - Jun 2022

- Faculty of Economics and Political Science, B.Sc. in Economics.
- Completed Military Service: 2023.

## SUMMARY

I'm a Aspiring Junior Front-End Developer with a solid foundation from intensive training programs and hands-on projects. Eager to bring creative solutions and grow through real-world development challenges.

## PROJECTS

### E-COMMERCE WEB APPLICATION

- Built a fully responsive e-commerce app with product listing, filtering, and cart functionality.
- Integrated external API for product data.
- Implemented routing with React Router, and all CRUD operations.

### LOGIN & CARD MANAGEMENT SYSTEM

- Developed a login authentication system with form validation and protected routes.
- Built a dynamic card management interface with add, edit, and delete features using React.

### PERSONAL PORTFOLIO WEBSITE

- Built a modern portfolio to showcase personal projects and skills.
- Includes animated sections, responsive layout, and clean. component structure.
- Portfolio Link: mostafakhaled14.github.io/My-Portfolio

### PORTFOLIO COLLECTION - UI EXPERIMENTS

- Developed four portfolio websites, each using a different technology stack:
  - Pure HTML, CSS, and JavaScript          - React.js
  - Bootstrap                              - Tailwind CSS
- Each version demonstrates a unique approach to layout, styling, and code structure.

### BOOKMARK APP

- Created a bookmark manager app that stores and removes website URLs using localStorage.
- Applied DOM manipulation and event handling for an interactive user experience.
